

Planet Healers - Funding Prospectus

Making Ecological Restoration Learnable for Everyone

The Opportunity

We have a proven, place-based model that turns environmental awareness into practical action. After 10 years of restoring Tsunul Reserve (a former cattle ranch → recovering dry forest with returning ocelots, coatis, and rare cenote species), we now offer a clear 5-stage Planet Healer Path that anyone can follow on their own land or in a community.

What We Deliver

- Free & paid educational resources (guides, courses, field notes, live sessions)
- Immersive skill-stay intensives at Tsunul Reserve
- Private consulting & restoration planning for individuals and small groups
- Train-the-trainer ripple effect so participants become the next generation of healers

Funding Ask (Flexible Project-Based Support)

We seek \$5,000 – \$25,000 project sponsorships (or multi-year commitments) to:

- Create and distribute the next wave of free learning materials
- Offer 8–12 scholarships for field intensives (priority to Global South participants)
- Expand online teaching tools and document Tsunul's measurable results

Impact You'll See

- More people are actively restoring land instead of just talking about it
- Documented biodiversity gains and soil recovery are shared openly
- A growing community of Planet Healers teaching others

Why Partner With Us

- Extremely low overhead (two-person Canadian sole proprietorship)
- 30+ years of hands-on experience + 10 years of on-the-ground proof
- Canadian-registered, working in Mexico — ideal for international impact without bureaucracy

Next Step

Reply to this prospectus or email Paul directly at planethealers@gmail.com to schedule a 15-minute call. We keep it simple, transparent, and results-focused.

"The Earth can recover. The work is learnable."
